PROFESSIONAL SUMMARY

Full Stack Software Engineer building production-grade web and mobile applications using **Next.js, React, Flutter, Node.js, TypeScript, MySQL, Redis, and AWS**. Experienced in scalable backend systems, workflow automation, cloud deployment, and secure application architecture.

EDUCATION

Thakur College of Engineering & Technology

B.E. in Computer Engineering

Mumbai, India

2024 – 2028

St. Rocks College

HSC — Science (PCM + Computers)

Mumbai, India

2023 – 2024

EXPERIENCE

Annadaan — Social Impact Startup

Sole Developer

Mumbai, India

Jan. 2025 – Present

- Founded and independently engineered a **dual-module** social-impact platform — **FoodRescue** (location-aware vendor surplus → NGO routing) and **Donation Drive** (UPI/item campaigns, admin approval workflow, public donor wall, **PDFKit** receipt generation) — using **Next.js 14**, TypeScript, Tailwind CSS, MySQL, JWT authentication, and **role-based access control (RBAC)**.
- Ran **3+ live donation drives** raising **Rs. 7,000+**, and won the **Rs. 5,000 Best Startup Award** at the college E-Summit for innovation in social-impact technology.

PROJECTS

TCET Centre of Excellence Portal | *Next.js 16, React, TypeScript, Prisma, MySQL, MinIO*

2025

- Engineered a production institutional platform serving **600+ students** and **130+ faculty**, powering internship management, facility booking, hackathon evaluation, and content publishing through secure multi-role access control.
- Successfully supported **2 college events** and **2 hackathons**, enabling registrations, evaluations, QR attendance, automated notifications, and end-to-end administrative workflows.
- Designed scalable backend services using **Prisma, Zod, MinIO**, asynchronous email queues, scheduled cron jobs, and modular service-layer architecture for multiple production workflows.

Academic Project Dashboard | *Next.js 15, TypeScript, Prisma, MySQL, AWS S3, NextAuth*

Jan. 2025 – Present

- Built an enterprise-scale project management platform supporting Admin, Faculty, and Student portals with secure authentication, version-controlled project lifecycle management, and role-based access.
- Designed a complete submission-to-publication workflow featuring mentor reviews, milestone tracking, immutable versioning, and a searchable public project showcase.
- Implemented background workers using the **Database Outbox Pattern**, bulk CSV provisioning, and AWS S3-backed secure file storage to automate notifications and large-scale project onboarding.

CivicResolve | *Next.js 15, Flutter, TypeScript, MySQL, Redis, Gemini AI*

Jan. 2025 – Present

- Architected a cross-platform civic grievance platform with Flutter and Next.js featuring secure APIs, organization-based routing, and end-to-end issue lifecycle management.
- Integrated Gemini AI for automated infrastructure damage assessment and photo-to-report generation, alongside geospatial duplicate detection with intelligent issue merging.
- Optimized backend performance using Redis caching, achieving up to **30× faster** API responses while delivering real-time analytics, mapping, and priority-based dashboards.

CERTIFICATIONS

Python 3.4.3 (IIT Bombay Spoken Tutorial) • Score: 80% • Mar. 2025

TECHNICAL SKILLS

Languages: Python, Java, C, C++, JavaScript, TypeScript, Dart, HTML, CSS, SQL, Bash

Frameworks & Libraries: Next.js, React, Flutter, Node.js, Express.js, Tailwind CSS, Prisma, EJS, Provider, Dio

Databases & Cloud: MySQL, Redis, Firebase, AWS (S3, EC2, IAM), MinIO, Nginx, Docker, Object Storage, Linux Server Admin

Backend & Architecture: REST APIs, JWT, OAuth, NextAuth, RBAC, bcrypt, HTTPS/CORS, Prisma, Service-Layer

Architecture, DB Outbox Pattern, Background Workers, Queue Processing, Cron Jobs

Dev Tools & APIs: Git, GitHub, Postman, VS Code, Zod Validation, Gemini API, Nodemailer, PDFKit, Leaflet, Google Analytics
